

Total Deliveries

- The following table reports the number of Medicaid ID numbers from deliveries and, by inference, the number of births.
- The data includes stillborn deliveries and, for multiple births, counts only 1 unless the claim is paid with more
- The data is from paid claims with dates of service (dates of deliveries) within the specified time periods
- The data is as accurate as the claims submission
- The data is not static and is current as of October 20, 2007
- There is a lag in claims because providers have 1 year to file a claim and a subsequent year to resolve claims
